What is Purified water?
- Dermalex Repair Psoriasis cream contains Purified water.

How to apply Dermalex Repair Psoriasis cream?
- Dermalex Repair Psoriasis cream does not cause rebound effect. With the exception of a minor burning sensation and/or tingling feeling on the treated skin. This is normal.

How keep and store Dermalex Repair Psoriasis cream?
- Dermalex Repair Psoriasis cream is water soluble. Reapply the cream after washing your Psoriasis spots.
- During the first couple of days using Dermalex Repair Psoriasis cream, apply the cream on a damp skin. Dilute a small quantity of the cream with lukewarm water and apply the cream on the affected skin with your fingers. There may be a minor burning sensation and/or tingling feeling on the treated skin. This is normal.
- Always apply Dermalex Repair Psoriasis cream on open wounds or on wounds that are the result of a cracking skin or scratching. Wear whenever possible loose clothing made of natural fibres. Natural fibres absorb the transpiration, body excretions and oily lotions.
- Avoid contact with eyes and genitals. In case of contact, rinse thoroughly with lukewarm water.
